Professional Summary

IT support and systems administration professional with experience in manufacturing, managed services and network operations. Supports users, Windows Server, Active Directory, Microsoft 365, virtualization, backups and network connectivity. Builds and troubleshoots networking labs covering enterprise switching, multi-area OSPF and gateway redundancy. Currently preparing for Cisco CCNA and seeking IT support, NOC, network support and infrastructure roles. Based in Yerevan and open to relocation within Europe.

Technical Skills

IT support and operations: Windows and macOS troubleshooting, incident response, SLA-based support, user provisioning, technical documentation and escalation.

Systems and infrastructure: Windows Server, Active Directory, Microsoft 365, VMware ESXi and vCenter, Hyper-V, Veeam, SAN/NAS and backup and recovery.

Network support: Cisco IOS/IOS-XE, MikroTik, LAN/WAN troubleshooting, IP addressing, VLANs, switching, wireless connectivity, cabling, FortiGate, ACLs, NAT and VPN support.

Monitoring and diagnostics: Zabbix, PRTG, SNMP, syslog, Windows Event Logs, packet captures, ping, traceroute and latency and packet-loss analysis.

Hands-on networking labs: OSPF (single-area and multi-area), BGP, IS-IS, HSRP, VRRP, 802.1Q trunking, inter-VLAN routing, LACP EtherChannel, Rapid-PVST+, ACLs, NAT/PAT, SSH and port security. Lab platforms: Cisco Packet Tracer, GNS3 and EVE-NG.

Professional Experience

System and Network Administrator | Iran Noubaft Textile Co

Isfahan, Iran | December 2025 – September 2026

- Supported a manufacturing IT environment of approximately 180 endpoints, maintaining Windows Server, Cisco and MikroTik connectivity, FortiGate firewalls and infrastructure services.
- Administered Active Directory, Microsoft 365, VMware ESXi/vCenter and Veeam backup and recovery workflows; resolved user, server and application-connectivity incidents.
- Troubleshot LAN/WAN connectivity, VLANs, firewall rules, NAT and VPN access using monitoring alerts, logs and packet captures.
- Performed network and server changes with configuration backups, post-change checks and recovery planning; documented incidents and recurring faults.

System and Network Manager | Electro Mizan Andisheh

Isfahan, Iran | May 2024 – January 2026

- Handled approximately 2,000 technical incidents across around 150 MSP clients during a four-month NOC assignment, covering Windows, macOS, routing, switching, VPNs, DNS and DHCP.
- Supported around eight recurring client environments, maintaining Cisco and MikroTik equipment, VLAN trunks, firewall policies and site-to-site VPN connectivity.
- Administered Active Directory and Microsoft 365 provisioning and offboarding for approximately 300 user accounts across client environments.
- Used monitoring tools and logs to isolate faults, restore services and coordinate escalation to specialist teams.

CCTV and Network Systems Technician | Andishmandan Ararat

January 2024 – March 2024

- Installed and supported approximately 150 IP cameras across around eight client sites, including PoE connectivity, IP addressing, switching and NVR/DVR integration.
- Diagnosed network, hardware and recording-system faults through connectivity tests, packet captures and on-site repairs.

Information Communication Technology Administrator | Almas Espadana MSP Co

May 2021 – October 2022

- Served as the sole on-site MSP infrastructure representative for a factory client, supporting servers, virtualization, network equipment, monitoring and incident response.
- Maintained backup and recovery operations, documented recovery procedures and coordinated service restoration with the MSP engineering team.

IT and Network Support Technician | Ebtekar Soole Sepahan

January 2019 – May 2021

- Provided IT and network support across three sites, including Windows troubleshooting, structured cabling, wireless infrastructure, VLANs and router and switch configuration.
- Documented network and telephony configurations and used connectivity tests, packet analysis and vendor escalation to resolve faults.

Networking Projects and Professional Development

Enterprise Networking Capstone

Independent lab work | September 2026 – Present | Cisco Packet Tracer

- Designed, configured and documented a simulated enterprise network spanning six internal sites: headquarters, a data center, three branch offices and a remote office.
- Implemented multi-area OSPF, HSRP gateway redundancy, VLAN segmentation, 802.1Q trunking, inter-VLAN routing, LACP EtherChannel and Rapid-PVST+.
- Configured ACLs, NAT/PAT, static NAT, SSH management, port security and guest/DMZ segmentation; incorporated DHCP, DHCP relay, DNS, NTP and syslog services.
- Configured and troubleshot additional routing and redundancy labs using OSPF, BGP, IS-IS, HSRP and VRRP.

Education

Bachelor of Science in Computer Software Engineering | Azad University, Shahin Shahr, Iran | 2019 – 2022

Training and Certification Preparation

- Cisco Certified Network Associate (CCNA) v1.1 (200-301) Cert Prep — LinkedIn Learning, October 2026
- CompTIA Network+ (N10-009) Cert Prep — LinkedIn Learning, October 2026
- IT Service Desk Service Management — LinkedIn Learning, September 2026
- Introduction to Microsoft 365 core services and admin controls — Microsoft Learn, September 2026
- Networking Basics and Linux Unhatched — Cisco Networking Academy, September 2026

Additional training: CCNA, Azure Administrator Associate, VMware VCP5-DCV, AWS and VoIP Business Execution, MCSE / Windows Server Systems Engineering | Local institution

These are training courses, not earned vendor certifications.

Languages

English: C1, assessed through an official IELTS examination; certificate expired. Persian: Native.
